Machinery & HDT

May review: expert meeting and GCS takeaways underscore replacement cycle, channel upgrades, and global expansion

May data and Global China Summit discussions reinforce a bullish outlook for China's construction machinery and HDT sectors, with the recovery broadening and deepening across multiple fronts. The latest industry expert readouts point to a steadily improving domestic excavator market, with YTD demand trending better than expected, and domestic OEMs consolidating share to c.88% as utilization and operating rates trend higher. The replacement cycle is emerging as the core incremental driver, supported by accelerating retirement of older equipment, tightening compliance, and a shrinking installed base, while channel restructuring and product localization are further strengthening the competitive position of local leaders. End-use demand remains anchored in steady-state civil work—municipal, infrastructure, and water conservancy—while property-related drag is fading at the margin and mid-sized excavator sales are improving.

At the Global China Summit, both Weichai Power and Sany Heavy delivered incrementally bullish messages. Weichai is leaning aggressively into the global AIDC onsite power cycle, with rapid capacity expansion, cost leadership, and a focus on lifecycle value capture through aftermarket and service. Sany Heavy, meanwhile, is prioritizing profit quality over volume, with a growth algorithm anchored in overseas share gains, pricing discipline, and cost-down, and expects 2Q/2H momentum to strengthen as comps ease and FX headwinds moderate. Both companies are seeing broad-based overseas expansion, margin uplift, and a clear focus on disciplined execution and shareholder returns. The sector's upcycle is now underpinned by replacement demand, channel upgrades, electrification, and export resilience, rather than any single end-market, supporting a constructive outlook for the remainder of 2026.

Stock views: We retain our broadly positive view while our pecking order remain unchanged, but recent share price action highlights a sentiment/fundamentals disconnect that looks increasingly investable. Weichai Power remains our top pick, with the Summit reinforcing investor focus shifting toward “how fast can it scale” in AIDC, including a 25–30% global market share ambition over the next 2–3 years, underpinned by rapid capacity expansion and lifecycle value capture through aftermarket and service. Sany Heavy and XCMG follow on improving domestic pricing behavior and overseas share gains, while Hengli Hydraulic remains preferred on supply-chain optionality. We also keep OW on Sinotruk (covered by Nick Lai). Zhejiang Dingli stays our least preferred given limited near-term catalysts. YTD, Weichai has led (H +96%, A +76%) even as most China construction machinery names remain negative, while global peers have outperformed (CAT +58%, CMI +28%) alongside MSCI World Industrial +10%—and the past-month's pullback (including Weichai down high-single/low-double digits) reads to us as a rotation/profit-taking rather than a deterioration in operating momentum, in our view.

Construction Machinery Expert takeaways: Domestic excavator market recovery accelerates, with replacement cycle and channel upgrades driving a constructive 2026 outlook

Our discussion with a leading machinery industry expert at the Global China Summit points to a broad-based recovery in China's excavator market in early 2026. Domestic OEMs are consolidating share, utilization and operating rates are trending higher, and the replacement cycle is poised to drive double-digit growth. Channel restructuring and product localization are further strengthening the competitive position of local leaders, while property-related headwinds are gradually fading at the margin.

- **The expert highlighted a surprisingly steadily improving excavator market in 4M26**, with industry demand up 12.5% Y/Y, led by domestic OEMs (+13.9% Y/Y) while foreign brands lagged (+3.4% Y/Y). As a result, domestic brands' China share rose to c.88% (vs. foreign c.12%), reflecting continued share consolidation as product performance converges and value-for-money remains compelling for the rental-heavy end-user base.
- **Key operating metrics signal healthy improving underlying demand**, with the industry operating rate rising from 42.5% in 2025 to 47% in April 2026. Equipment utilization has also inflected higher, reaching c.135 hours/month in April (vs. 97 hours/month in 2025 and 100 hours in March), which is particularly constructive for rental economics and purchase appetite. These trends are consistent with improving project activity and a more supportive demand environment.
- **End-use exposure remains anchored in "steady-state" civil work, supporting volume stability and reducing volatility.** The expert estimates recent equipment usage as c.30% municipal, c.18% roads/rail, c.18% farmland water conservancy, c.9% property, and c.8% mining. The structurally small-excavator-heavy mix (small c.61%, mid c.30%, large <10%) is anchored by municipal and agricultural projects, while mid-size demand is tracking roads and property. Notably, the property-linked portion has edged up to c.9%, suggesting property is becoming less of a headwind at the margin.
- **The expert expects 2026 excavator sales to grow 10–15% Y/Y, with the same growth pace likely to continue in coming years, with the replacement cycle as the core driver amid improving new project starts.** Accelerating retirement of China II/III emission equipment and tightening compliance are pulling forward renewal demand, while the installed base has declined in absolute terms—creating room for replacement-led volume growth. The 2026–2028 period should lap the 2020–2022 high-sales vintages, implying a potentially stronger replacement wave ahead, provided contractor cash-flow conditions continue to normalize.
- **Competition continues to favor scaled domestic champions**, with local OEMs gaining on cost, parts localization, and after-sales, and shrinking performance gaps versus international peers in mainstream applications. Foreign brands are increasingly concentrated in higher-end and special-duty niches. Channel restructuring is also accelerating: weaker dealers are being consolidated, domestic OEMs are pushing more direct/controlled channels, and foreign OEMs

are rationalizing to fewer, larger dealers—steps that should improve channel health and service capability over time.

Weichai Power and Sany Heavy China Summit takeaways: TAM expansion, global ambitions, and margin discipline drive positive outlook

Both Weichai Power and Sany Heavy delivered incrementally bullish messages at the May 20–22 Global China Summit, highlighting accelerating global ambitions, margin uplift, and a focus on disciplined execution. Management teams from both companies emphasized their ability to capture new growth opportunities in AIDC, electrification, and international markets, while maintaining a clear focus on profitability and shareholder returns.

- **Weichai Power’s management leaned into the global AIDC power cycle, reaffirming 2026 AIDC engine shipment guidance at 3,500–4,000 units, with diesel engines as the mainstay and gas engines gaining traction for data center applications.** The company is targeting a 25–30% global AIDC market share in the next 2–3 years, leveraging rapid capacity expansion, cost leadership, and flexible production lines. Net margins for AIDC backup engines are above 25%, with product performance now on par with global leaders. Aftermarket and service are a strategic focus, with the company aiming to capture 20–30% of lifecycle revenue, especially in North America. SOFC is also a strategic growth area, with 30MW capacity targeted in 2026 and 200MW in 2027, and commercial-scale profitability expected after 100MW annual output. Management highlighted that brand recognition and large-scale market validation remain the next hurdles, but the company’s rapid capacity expansion and cost structure are clear competitive advantages. In the HDT/machinery market, Weichai’s engine share is recovering in 2026, with new energy powertrain revenue targeted at Rmb6–8B, and market share gains accelerating in large construction machinery engines, especially mining excavators.
- **Sany Heavy’s management reinforced a consistent message of execution-driven growth, with 2Q/2H momentum poised to strengthen as comps ease and FX headwinds moderate.** The company is prioritizing profit quality over volume, with overseas share gains, pricing discipline, and cost-down as the core growth algorithm. Sany is seeing broad-based overseas expansion, with Europe and the Americas showing strong momentum and Q2 positioned as the highest revenue and profit quarter of the year. Management emphasized a deliberate refusal to engage in price wars, highlighting recent price actions and a focus on margin durability. Industry consolidation is accelerating, with leaders like Sany and XCMG able to sustain investments and defend pricing through the cycle. Electrification is a tailwind and differentiator, but not yet the core driver, as overseas penetration remains low. Sany’s internationalization strategy and capital allocation are increasingly focused on balancing a high safety buffer with lifting shareholder returns.

May excavator and loader sales highlight broad-based recovery, improving demand mix, and accelerating electrification

May data confirm that China’s construction machinery sector is sustaining strong growth momentum seen during this year’s March-April peak season, with both

excavator and loader sales posting robust double-digit Y/Y gains. The recovery is broad-based, with domestic demand supported by infrastructure and stabilizing construction activity, while exports continue to deliver incremental growth. The improving mix—especially the surge in electric loader sales—underscores the sector’s adaptability and the emergence of electrification as a meaningful tailwind. Year-to-date trends reinforce a constructive outlook for the remainder of 2026, with both domestic and export channels contributing to sector resilience.

- **May excavator industry sales rose to 24,794 units (+36% Y/Y), sustaining an impressive growth rate even as volumes seasonally normalized from April’s high base.** Domestic excavator sales reached 11,628 units (+39% Y/Y), indicating continued improvement in local demand conditions, likely supported by infrastructure activity and gradually stabilizing construction-related appetite. The domestic sales mix is also improving, with mid-sized excavator sales gaining share, suggesting that the property-related drag is gradually fading and that replacement and downstream construction activity are becoming more supportive. Export excavator sales remained robust at 13,166 units (+34% Y/Y), reinforcing the sector’s global competitiveness and providing a steady incremental growth engine.
- **Loader sales in May also remained upbeat at 13,405 units (+27% Y/Y).** Domestic loader sales increased to 7,418 units (+23% Y/Y), with electric loaders contributing 4,733 units, underscoring accelerating electrification penetration and a healthier product mix domestically. Export loader sales climbed to 5,987 units (+33% Y/Y), though electric loader exports were still nascent (216 units), suggesting further runway as overseas markets adopt electrified solutions and Chinese OEMs continue to build channels and after-sales capabilities.
- **YTD, the construction machinery upcycle remains intact.** Excavator sales reached 126,875 units (+25% Y/Y), driven by domestic +19% and exports +33%, while loader sales totaled 67,162 units (+27% Y/Y), with exports particularly strong at +41%. Overall, May industry sales support a constructive outlook for the remainder of 2026: domestic recovery appears to be progressing steadily, exports continue to provide diversification and resilience, and electrification is emerging as an incremental structural tailwind—especially in products like loaders.

May HDT sales highlight resilient Y/Y growth, a sharp LNG pullback, and a policy-driven surge in electric HDT penetration

May data confirm that China’s HDT market remains resilient, with Y/Y growth holding up even as the seasonal sales peak passes. The most notable trend is a sharp contraction in LNG HDT sales and penetration, as the oil-gas price gap narrowed rapidly, while electric HDT penetration surged to a new high, driven by both policy incentives and the shift away from LNG amid high gas prices. Export demand continues to provide a solid underpinning, but the sustainability of current electric HDT penetration will hinge on future subsidy policy.

- **China’s HDT market sustained its strong momentum in May 2026,** posting total sales of c.103,000 units (+16% Y/Y), even as volumes declined 12% M/M from April as the traditional sales peak tapered off. This sequential moderation is consistent with historical patterns, as domestic sales typically peak from

March through mid-May before normalizing into the summer. Despite the M/M pullback, the sector's Y/Y growth remains robust, underscoring the resilience of replacement cycles and ongoing fleet renewal. Export sales in May also remained resilient, up an estimated 28% Y/Y, despite a modest sequential decline attributed to ongoing geopolitical tensions in the Middle East. The data highlights the sector's ability to sustain healthy growth even as the domestic cycle transitions past its seasonal high.

- **LNG HDT sales experienced a significant contraction in May**, with volumes declining over 55% M/M and segment penetration falling to c.20%. This softness was widely anticipated, as the rapid rise in LNG prices since late April has eroded the economic advantage of LNG trucks, particularly in northern provinces where diesel prices at private stations are now comparable or even lower. The narrowing oil-gas price gap has led many fleet owners to delay LNG truck purchases or shift to alternative powertrains. While LNG HDTs remain a structural component of the market, their near-term growth is likely to be constrained until fuel economics become more favorable, and we expect the segment to remain under pressure in the coming months.
- **Electric HDT sales in May rose over 90% Y/Y, but it's important to note that this high growth rate is largely a function of the still low comparison base**, as the China IV subsidy program only began to take effect from late June/July last year. The domestic penetration ratio climbed to c.40% in May, representing a modest pick-up from the 32% run rate seen during 2H25. The increase in May's e-HDT penetration ratio is partly encouraged by the recent rise in oil and gas prices, which has prompted more fleet owners to shift away from LNG. However, we believe that without the current subsidy in place, the penetration ratio would likely decline. It remains uncertain whether China will provide similar subsidy support from 2027 onwards for the upcoming China VI replacement cycle, and the sustainability of current penetration levels will depend heavily on future policy direction.

Share price performance review: Sector leaders diverge as global peers outperform, but fundamentals support our pecking order

- **YTD share price performance across the sector has been mixed, with Weichai Power continuing to lead the pack**—Weichai Power-H is up 96% and Weichai Power-A up 76%—reflecting strong investor confidence in earnings momentum, margin expansion, and structural growth themes such as AIDC and export strength. In contrast, most China construction machinery names have lagged, with XCMG (-13%), Zoomlion-A (-10%), SANY Heavy-A (-8%), SANY Heavy-H (-7%), and Zhejiang Dingli (-8%) all in negative territory. Jiangsu Hengli (+10%) has been a relative bright spot among domestic supply-chain beneficiaries. Global peers have materially outperformed: Caterpillar (+58%) and Cummins (+28%) are both well ahead of the MSCI World Industrial Index (+10%), benefiting from defensive flows and robust end-market demand.
- **Over the past month, the sector has experienced a notable pullback in most China names**, led by Weichai Power-H (-11%), Weichai Power-A (-9%), Zhejiang Dingli (-9%), and SANY Heavy-A/H (-6%). Zoomlion-A (-1%) was comparatively resilient, while Zoomlion-H (+1%) and XCMG (+1%) managed

modest gains. Jiangsu Hengli (+7%) stood out as the key outperformer, supported by continued optimism around automation and robotics. Global names were steadier, with Caterpillar up 1% and Cummins down 4%, against a slightly softer broader tape (MSCI World Industrial -1%), suggesting recent moves are more about rotation and profit-taking than a broad-based de-rating of the industrial complex.

- **We view the recent consolidation as constructive and not inconsistent with the improving operating trends we see for 2026.** With domestic excavator and loader data remaining supportive, export competitiveness intact, and pricing power improving, we expect investor focus to gradually shift back toward operational execution, replacement-cycle tailwinds, and mix improvement. Our pecking order remains unchanged: Weichai Power as top pick, followed by SANY Heavy, XCMG, and Hengli Hydraulic, with Zhejiang Dingli as our least preferred name.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

Coverage Universe: Li, Karen : COSCO SHIPPING Holdings Co Ltd - A (601919.SS), COSCO SHIPPING Holdings Co Ltd - H (1919.HK), CRRC Corp - A (601766.SS), CRRC Corp - H (1766.HK), Cathay Pacific Airways (0293.HK), China Merchants Port Holdings (0144.HK), Estun Automation - A (002747.SZ), Evergreen Marine (2603.TW), Full Truck Alliance (YMM), Hongfa Technology - A (600885.SS), International Container Terminal Services Inc (ICT.PS), JD Logistics (2618.HK), Jiangsu Hengli Hydraulic - A (601100.SS), Leader Harmonious Drive System Co. J.P. Morgan Equity Research Ratings Distribution, as of April 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	51%	37%	12%
IB clients**	83%	79%	74%
JPMS Equity Research Coverage*	49%	39%	13%
IB clients**	94%	93%	85%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

The author(s) of this research report may not be licensed to carry on regulated activities in your jurisdiction and, if not licensed, do not hold themselves out as being able to do so.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC (“JPMS”) acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit <https://www.theocc.com/components/docs/riskstoc.pdf> for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or https://www.finra.org/sites/default/files/2020-08/Security_Futures_Risk_Disclosure_Statement_2020.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries (“J.P. Morgan Private Bank”), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Where more than one legal entity is listed under an analyst's name, the first legal entity is responsible for the production unless stated otherwise. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below in the legal entity disclosures, this material has been distributed by the legal entity responsible for production, or where more than one legal entity is listed under the analyst's name, the first legal entity will be responsible for distribution. If you have any queries, please contact the relevant Research Analyst in your jurisdiction or the entity in your jurisdiction that has distributed this research material.

U.S.: J.P. Morgan Securities LLC (“JPMS”) is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst’s involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan’s current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own

independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
