Jiangsu Hengli Hydraulic - A

4Q25 miss a nuance, new growth drivers and global expansion support OW; updating our model

We update our model for Hengli Hydraulic following FY25 results that highlighted the company's ability to navigate a complex operating environment while capitalizing on a favorable machinery cycle and ongoing product upgrades. Despite encountering FX volatility and inventory impairment that weighed on reported profit, Hengli continued to deliver robust revenue growth and extend its market share, particularly in core segments supported by resilient export demand and technical enhancements. Progress in new business lines—including robotics, automation and FA/ball screw—remains on track, with global expansion underpinned by the ramp-up of Mexico and Indonesia operations. Our revised FY26-28 forecasts are 7-10% above consensus, reflecting confidence in a c.20% recurring profit CAGR and incremental upside from new business. With Mexico's breakeven now expected in 2027 and a diversified pipeline of growth drivers, we remain OW, adjusting our PT to Rmb121 with the PT date extended to June 2027.

- **Machinery cycle strength and market share gains are driving Hengli's core growth.** Hengli's FY25 revenue reached Rmb10.94B, up 16.5% Y/Y, with core segments like excavator cylinders and pump/valve products posting c.23% Y/Y growth. The company's ability to capture share from competitors is evident, with large excavator cylinder exports up 24% Y/Y and key customers such as Caterpillar showing c.20% growth Y/Y. Non-excavator cylinders posted 5% growth Y/Y, with new energy and marine segments up 32% and 30% Y/Y, respectively.
- **Robotics, automation and FA/ball screw are emerging as more meaningful contributors,** with FY25 revenue from linear motion exceeding Rmb80M and targeted to reach Rmb300M in FY26. Mexico and Indonesia factories are ramping up, with Mexico expected to achieve Rmb100M monthly output in FY26 and breakeven in FY27. The company's regional strategy, including a new subsidiary in Africa, is designed to capture incremental demand and mitigate risks from trade tensions. These new business lines, supported by investments in equipment and R&D, are expected to drive incremental profit from 2027 onward.
- **The 4Q25 and FY25 headline misses reflect temporary headwinds, with recurring profit set to rebound in 1Q26E, though FX losses may continue to drag on reported earnings.** Recurring profit in 4Q25 was c.13% Y/Y, largely in line, and management commentary suggests that fundamentals remain intact. Management noted that the 27% Y/Y decline in FY25 Op-CF was a function of timing in bill discounting and elevated cash payments, rather than a deterioration in underlying cash generation. We expect recurring profit to rebound strongly in 1Q26, likely up c.30% Y/Y, driven by a recovery in core operations and margin stabilization.

Summary Investment Thesis and Valuation

Hengli Hydraulic (Hengli) is a leading supplier of excavator hydraulic cylinders in China, with a market share exceeding 40% and a strong position in the pumps and valves market. The company is well positioned to leverage its leadership in the domestic cylinder market, in our view, with opportunities for further market share gains in segments with relatively low penetration, such as larger-sized excavator cylinders, valves and pumps. Hengli has strategically prioritized business diversification since 2022 to reduce its reliance on excavator products and supply chain concentration within China. The company's expansion into linear motion products, particularly in the humanoid robot and machine tool segments, is expected to contribute to revenue. This aligns with Hengli's strategy to tap into high-growth areas and capitalize on the increasing demand for precision components in advanced manufacturing processes.

Our DCF-based Jun-27 PT is Rmb121. The WACC rate used in our DCF analysis is 8.4%, with assumptions as follows: risk-free rate: 3.0%; market risk premium: 6.8%; Beta: 1.0x (based on Bloomberg); after-tax cost of debt: 4.3%; terminal growth: 5%; and target gearing: 25%.

Updating our model, 4Q25 miss likely a nuance

We update our model for Hengli Hydraulic after FY25 results, with the headline miss mainly due to FX losses and inventory impairment, but our investment thesis remains unchanged. Gross margin declined 1.3ppts, to 41.6%, and Op-CF contracted 27% Y/Y, reflecting both non-recurring impacts and a less favorable product mix. Our revised forecasts for FY26-28 are 7-10% above consensus, reflecting confidence in recurring profit growth at a c.20% CAGR and new business upside not yet fully priced in. The Mexico plant is progressing toward breakeven, with the turnaround now expected in 2027, but this is not a drag on the group's outlook. We remain OW, seeing buying interest on the dip, and continue to view Hengli as the best-positioned robotics supply chain play, with robust fundamentals and margin resilience still in place.

4Q25 headline miss a nuance, with recurring profit and market share gains underscoring the growth story

The FY25 results showed revenue of Rmb10.94B, up 16.5% Y/Y, slightly ahead of market expectations, while net profit reached Rmb2.73B, up 9% Y/Y, but below our pre-print estimate due to FX losses and higher inventory impairment. Gross margin declined 1.3ppts, to 41.6%, and net margin fell 1.7ppts, to 25%. Recurring profit in 4Q25 was c.13% Y/Y, largely in line, with the miss driven by translation losses on USD assets and provisions for the Mexico factory. Op-CF for FY25 decreased 27% Y/Y due mainly to timing differences in bill discounting and increased cash payments for salaries and materials, but underlying cash collection remains healthy. Management confirmed that the fundamentals are intact and the machinery cycle remains favorable, with market share gains across all key segments and margin resilience supported by product mix optimization and operational efficiency.

Machinery cycle remains favorable, with robust domestic and export demand supporting volume growth and market share gains across all key segments

Hengli's core segment delivered solid growth in FY25, highlighted by strong excavator demand. Excavator cylinder sales reached 625,000 units, up 23% Y/Y, with large/medium/small excavators up 44%/26%/15% Y/Y. Pump and valve revenues grew 23% Y/Y, with excavator valves and pumps up 26% and 20% Y/Y, respectively. Non-excavator cylinders posted 5% growth Y/Y, with strong contributions from new energy and marine, while shield tunneling cylinders are expected to rebound sharply in 1Q26 after a decline in FY25. Overseas demand was strong, especially in Europe and India, with large excavator cylinder exports up 24% Y/Y and key customers like Caterpillar showing c.20% growth Y/Y. Hengli expects stable overseas demand for the next one to two years and is expanding its footprint in Africa and other regions.

Margin resilience remains core part of Hengli story, with product mix optimization and operational efficiency helping offset OEM price pressure and support profitability

Despite a decline in gross and net margins, Hengli's margin profile remains robust, supported by technical upgrades and product mix optimization. Pricing remained stable despite OEM price pressure, and management confirmed that margin resilience is driven by scale effects and ongoing cost controls. The company's focus on higher-value segments and its ability to execute on cost and product strategy amid tariff uncertainties further validate the margin story. Management expects margin

improvement as new business segments ramp up and robotics commercialization accelerates, but acknowledges that near-term volatility may persist.

Robotics and automation emerging as Hengli's new growth engine, with technical leadership and early-stage commercialization positioning company for multi-year upside

Management emphasized that robotics-related revenue, while still modest, is ramping up, with investments in equipment and R&D. The company is focused on linear components, including ball screws and planetary roller screws, which are gaining traction in advanced manufacturing and humanoid robotics. Sample deliveries for bionic hand and humanoid robot projects are underway, and Hengli expects robotics-related revenue to accelerate as commercialization advances. Technical leadership in linear joints and ball screws is attracting global clients, positioning Hengli to benefit from both the machinery upcycle and the next wave of automation.

FA/ball screw business scaling rapidly, with custom product sales and control system collaborations expected to drive profitability and margin improvement

The linear motion business remains in early stages, with FY25 revenue exceeding Rmb80M, but gross margin still negative due to market entry costs. Hengli targets Rmb300M in revenue for FY26 and aims to achieve profitability next year, supported by increased custom product sales and collaboration with control system partners. The company's R&D focus on micro ball screws, cost reduction through lathe machining, and system-level integration positions it to capture incremental demand as the robotics sector moves toward commercialization. Management expects margin improvement as the business scales, with custom products commanding premium pricing and partnerships with software control system companies enhancing overall profitability.

Global expansion through Mexico and Indonesia factories progressing, with breakeven in sight and flexible capacity planning supporting future growth

The Mexico factory is progressing toward breakeven, with monthly output expected to reach Rmb100M in FY26, though a small loss is expected this year. Management targets profitability in FY27 as annual revenue surpasses Rmb1B. North American customer expansion continues, mainly through component exports, with plans to localize raw material supply pending further feasibility studies. The Indonesia factory contributed Rmb20M in revenue in FY25, with full ramp-up expected in 2H26 and annual revenue projected at Rmb200M-300M. Capacity expansion is flexible, relying on equipment upgrades and process improvements, rather than new plant construction. Fixed asset investment is at a low point, with future capex focused on robotics and industrial pump/valve capacity expansion.

Management's approach to working capital and cash collection signals underlying business health despite headline Op-CF volatility

The briefing highlighted that the Y/Y decline in Op-CF for FY25 was due mainly to timing differences in bill discounting and increased cash payments for salaries and materials, rather than any deterioration in business fundamentals. Management emphasized that receivables and collections remain healthy, and the cash flow situation is expected to improve as new business ramps up. The shift toward more bank acceptance bill settlements and less cash payments reflects evolving working capital management, which should support future liquidity and operational flexibility.

Segment-level insights reveal strong performance in motors and industrial pump/valve, with targeted expansion plans for high-margin products

Management shared that the motor business achieved c.Rmb900M in revenue for FY25, with gross margin recovering to 40-50%. The company plans to expand capacity for travel motors, targeting motor segment's total revenue scale to Rmb1B-2B in the coming years. Industrial pump/valve products maintained stable growth of 30-35% annually, with broad applications in injection molding and forging. These segments are expected to contribute increasingly to Hengli's diversified revenue base and margin profile, offsetting softness in other areas and supporting the overall margin story.

Management highlighted that Hengli is expanding its footprint in Africa, with a new subsidiary established in Guinea and plans to acquire land for local customer service. The company expects overseas demand to remain stable for the next one to two years, with strong growth in Europe and India. The regional strategy is designed to capture incremental demand and mitigate risks from trade tensions, supporting Hengli's global expansion and market share gains across all key segments.

Investment Thesis, Valuation and Risks

Jiangsu Hengli Hydraulic Co Ltd - A (*Overweight; Price Target: Rmb121.00*)

Investment Thesis

Hengli Hydraulic (Hengli) is a leading supplier of excavator hydraulic cylinders in China, with a market share exceeding 40% and a strong position in the pumps and valves market. The company is well positioned to leverage its leadership in the domestic cylinder market, in our view, with opportunities for further market share gains in segments with relatively low penetration, such as larger-sized excavator cylinders, valves and pumps. Hengli has strategically prioritized business diversification since 2022 to reduce its reliance on excavator products and supply chain concentration within China. The company's expansion into linear motion products, particularly in the humanoid robot and machine tool segments, is expected to contribute to revenue. This aligns with Hengli's strategy to tap into high-growth areas and capitalize on the increasing demand for precision components in advanced manufacturing processes.

Valuation

Our DCF-based Jun-27 PT is Rmb121. The WACC rate used in our DCF analysis is 8.4%, with assumptions as follows: risk-free rate: 3.0%; market risk premium: 6.8%; Beta: 1.0x (based on Bloomberg); after-tax cost of debt: 4.3%; terminal growth: 5%; and target gearing: 25%.

Risks to Rating and Price Target

Key downside risks include: (1) lower-than-expected excavator sales volumes; (2) slower-than-expected market share gains for pumps and valves; (3) a deterioration in GP margin; and (4) escalating trade tensions and higher-than-expected tariffs for China's products.

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Jan 15, 2019. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan’s continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.

J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe). NR is Not Rated. In this case, J.P. Morgan has removed the

rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

J.P. Morgan Equity Research Ratings Distribution, as of April 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	51%	37%	12%
IB clients**	83%	79%	74%
JPMS Equity Research Coverage*	49%	39%	13%
IB clients**	94%	93%	85%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at <http://www.jpmorganmarkets.com>, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, <http://www.jpmorganmarkets.com>. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of <http://www.jpmorganmarkets.com> where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to [UK MIFID Research Unbundling exemption](#) for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see <https://www.jpmorgan.com/disclosures/cryptoasset-disclosure>.

These discrepancies should not impact the overall

investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.
